

EXPERIENCE

DYNATRACE

Detroit, MI / Remote

Senior Software Engineer / Team Captain / Product Owner

June 2020 - Present

- Created licensing APIs for developer users with focus on security, optimality, and protective rate-limiting.
- Operated as dual Product Owner/Agile Advocate while maintaining quality and velocity as Developer.
- Responsible for coordination and development of internal/external releases and products, including license overview screens, APIs for users to gather licensing usage metrics, and user-role based controls.
- University Team Captain, responsible for automated AWS-hosted virtual classroom creation at scale, cloud-based Learning Management System for users learning more about Dynatrace, and facilitation of online exams that resulted in certifiable industry-standard certifications.
- Guided developer goal setting and performance reviews; promoted numerous employees to higher roles.

KARAT

Remote

Interview Engineer (Contractor)

November 2019 - Present

- Conducted 600+ first-round professional technical interviews to determine technical skill of candidates.
- Responsible for accurately capturing and describing the relative skill of the candidates in written form.
